

# Observatory and Planetarium Lake Boga, Victoria 3584

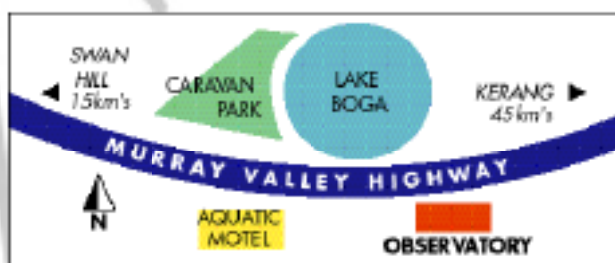

Tours are conducted (weather permitting) and last approximately one and a half hours. Viewing is through one of the largest auto GPS guided telescopes in Victoria housed in the special observing dome. Other equipment is also available.

**Tours Commence** From **April to October 7-30pm**  
Thursday to Sunday each week  
From **November to March 8-30pm**  
Thursday to Sunday each week  
Other times by arrangement.  
**BOOKINGS ESSENTIAL.**

Night viewing changes with time and only certain objects will be visible on any given night. This is dependant on the time of the year and the phase of the moon.

Generally we do not operate on four nights of the month during full moon. The moon is so bright, making it difficult to observe other planets and objects on these nights.

Solar Observing is available during daylight hours and is part of our PLANETARIUM DAYLIGHT VIEWING.

**Bookings 03 5037 2428 or 0400 123 962**
